

## 800.872.4427

This includes registered nurses and therapists providing intermittent visits to instruct family members in the care of the child or infant. They will instruct the client or his family until they are competent with the care. Then on a regular basis they will continue to visit the client to assess progress, reinforce the doctors' plans and assist the client to meet their goals. The frequency of the visits and duration of how long the nurse or therapist continues to visit the client is specific to each case.

### This type of care could include:

- Pre or Post Surgical Care
- Respiratory Diagnosis
- Cardiac Diagnosis
- Cancer
