

Pediatric Private Duty

800.872.4427

Private Duty Nursing consists of a nurse or nurses tending to the child or infant for an entire shift or shifts, usually 6-8 hours per day up to 24 hours per day.

Our company offers a total package of pediatric programs and services designed exclusively for infants, children and adolescents. We work with physicians, family members and the entire healthcare team to develop a comprehensive plan of care addressing the client's goals and expectations. We recognize each client and their family has different needs, and requires a unique approach.

Who can benefit from pediatric home health care? Infants and children with the following conditions:

- Cardiac abnormalities
- Apnea
- Respiratory diagnoses
- Prematurity
- Neurological impairment
- Orthopedic conditions
- Digestive disorders
- Birth and congenital defects
- Infections
- Recuperating from surgery, burns or accidents
- Terminal illness

American Home Health's personnel are thoroughly versed in administering the most sophisticated therapies in the home:

- Ventilator Care
- Oxygen Therapy
- Tracheostomy Care
- BiPAP or CPAP
- Intravenous Therapy
- Wound Care
- Ostomy Care
- TPN – Total Parenteral Nutrition
- Monitoring Devices
- Tube Feedings
